

# SPEED AND COMFORT...REDEFINED

In just over a decade, DCB has redefined the boundaries of the custom boat world. This is the result of endless dedication to "state of the art" boat production, a desire to be forerunners in the industry and attaining a level of quality workmanship that is unparalleled. Unlike most conventional boat builders, every boat produced at DCB is treated as an individual, unique creation, customized to the precise wishes and desires of each intended owner. Every model is an original, created in-house by DCB factory trained technicians, using the latest and most advanced design and construction technologies available today. From concept to delivery, every boat produced at DCB is a project of passion; a passion for endless self-critique, re-evaluation of design, and refined production techniques. Each DCB is the newest "work of art" complementing our ever-growing gallery of boats. Dave's Custom Boats is the company striving to make the difference between ordinary and extraordinary in all aspects.
